

2010 Advancing Solar Energy Research

Scialog (science + dialog) funds early career scientists in pursuit of transformative research

Arun Majumdar

Director

U.S. Department of Energy, Advanced Research Projects Agency-Energy

Energy Innovation in the 21st Century

The United States faces a number of challenges in the 21st century as a result of our antiquated energy system—dependence on imported oil, global climate change, and threats to our economic competitiveness, to name a few. Transitioning to a more sustainable energy infrastructure will require an enormous amount of innovation by American scientists and entrepreneurs over the next few decades. Dr. Majumdar will discuss the need for energy innovation and how it can help rejuvenate American economic leadership.

Friday, October 15, 7:00 p.m., Center for Creative Photography, University of AZ

Introduced by Honorable Gabrielle Giffords
